- Web Development
- Database Management
- APIs and Integration
- Soft Skills and Lifelong Learning

PROFILE SUMMARY

As an aspiring software developer, I am enthusiastic about applying my foundational knowledge and coding skills to real-world projects. With a strong educational background in computer science and a passion for problem-solving, I'm committed to continuous learning and growth in the dynamic field of software development. I'm eager to contribute to collaborative teams, adapt to new technologies, and take on exciting challenges. My drive for innovation, attention to detail, and dedication to producing high-quality code make me a promising addition to any development project. I'm seeking opportunities to learn, contribute, and further develop my skills as a software developer while making a positive impact on cutting-edge projects.

PROJECTS

- **College Automation**

The College Management System project is a web-based software system that is designed to help colleges and universities manage their day-to-day operations more efficiently and effectively. The system is designed to automate many of the manual processes involved in managing a college or university, including student enrollment, faculty management, course scheduling, and administrative tasks.

Front-End : Android , HTML , CSS , JavaScript

Back-End : Python , MySQL
